## Mino CENS

Mino CENS® are level dependent electronic ear plugs that provide an impressive 31dB SNR with the ability to enable the wearer to hear sounds around them. The state-of-the-art digital amplifier ensures that each user is never subjected to over attenuation and is as effective in a quieter environment as it is in the very noisiest environment.

Like full CENS® ProFlex, Mino CENS® still allow for clear communication as well as featuring 3 user-selectable levels of amplification for enhanced ambient awareness. They also feature stylish transparent red and blue shells, indicating the left and right device, each of which is fitted with a replaceable wax guard and an extraction cord for easy removal from the ear.

Mino CENS® are supplied with 5 different sized high quality foam ear tips, providing an effective and comfortable wearing experience. Mino CENS® tips are colour coded by size, so simply find the tip size that best fits, then reorder only the colour required.

Available in three models - Mino CENS® & Mino CENS® Noir (for shooting) & Mino CENS® Industrial. Quantity breaks available. Contact us for details.

Mino CENS® maintenance kit also available which contains 2 of each 10.5mm (L), 10.5mm (S), 12mm (L), and 14mm (S) foam tips, brush tool with magnet, 2 micro Pureguard tools, 1 left & 1 right, Pureguard wax guard.

### Key Features

- User Adjustable Volume Booster
- Digital Circuitry
- SNR 31dB
- Certified To EN352-2:2002 & EN352-7:2002
- Effectively Suppresses Dangerous Noise Levels
- 3 User-Selectable Amplification Levels
- Hear Conversation As Normal
- Unobtrusive, Comfortable Universal Fitting
- Colour Coded Earpieces (Red For Right, Blue For Left)

## ER-20 Music Earplugs

ER-20s provide an inexpensive and effective solution to noise protection. Made from soft silicone, these generic noise suppressors fit any ear and provide an attenuation of 20dB, while still allowing the natural sound of the environment to be heard. Standard unfiltered noise plugs generally reduce high frequencies more than others, making voices and music sound unclear. Because ER-20s are a flat response earplug, they closely match the ear's natural frequency response, minimising the loss of high frequencies when performing.

Ideal for clubs, concerts and noisy working environments, ER-20s are supplied with a key chain case for easy storage, and if maintained regularly can last for many years.

ER-20s are available in two sizes, standard and baby blue, which are ideal for small ear canal and children.

**ER20S** Large Clear  
**ER20SMC** Small Blue

## CENS ProFlex Universal Tip Kit

Introducing the universal solution for wearing CENS® ProFlex prior to using custom-made earpieces.

These new eartips perfectly fit CENS® ProFlex Electronic or Passive Modules (not supplied), allowing the user to experience the comprehensive noise protection of CENS® without the need for a custom-made earpiece.

The soft silicone domed eartips are supplied in two sizes, allowing the completed earpiece to fit comfortably into the ear, without falling out during use. Once the user has got used to CENS® ProFlex digital, the electronic modules can be fitted into custom-made earpieces for the complete CENS® ProFlex experience.

Supplied with 2 x flexible generic tips (L & R), 2 x large domed silicone eartips, 2 x small domed silicone eartips, 2 x alcohol wipes, fitting tool and zip case with foam insert.

**CENS-UT-KIT** Universal Tip Kit  
**ACC404-1** Replacement Alcohol Wipe

## Noise Braker Filter

For fitting into custom-moulded earpieces for hearing protection. Allows for ambient sound to enter the user's ear, while helping to reduce harmful noise to safe levels. Sold individually.

**F5** Noise Braker® Filter

# Noise Protection

## EarPlanes

Proven and used by millions of air travellers worldwide. Relieves ear discomfort, clogging and popping with the exclusive CeramX filter that regulates air pressure naturally. Supplied in pairs.

**ACC372** Adult Size  
**ACC373** Child Size

## Sound Level Meter

Features a range from 35 to 130dB, as well as maximum hold function, A & C frequency weightings, fast & slow dynamic characteristic models, AC and DC signal output and back-screw for tripod fixture.

**SLM1** Sound Level Meter

## 3M Foam Ear Plugs

Soft, uncorded disposable earplugs. Hypo-allergenic slow recovery foam with a tapered surface. Box of 200 pairs.

**ACC377** 3M Foam Ear Plugs

## Peltor Optime III Ear Defenders

Peltor™ Optime III ear defenders have been developed for use in extremely high noise environments, particularly those dominated by low frequency sounds. The product is based on a technology featuring double cup design to help minimise resonance effect, resulting in excellent high frequency attenuation. In addition, a combination of specially designed spacer and cup helps to provide excellent protection against low frequency sounds.

**BIL219B** Ear Defenders
