

PURETONE MUSIC

In-Ear Monitors & Noise Protection
For Musicians, DJs & Music Lovers

About Puretone Music

Puretone Music takes hearing seriously. Since 1976, we have been manufacturing custom-made earpieces and in-ear devices designed to enhance and protect your hearing.

Our MOVE and PRO ranges are proudly designed and manufactured in the UK at our factory in Rochester, Kent. Every earpiece is carefully crafted by our experienced team with a focus on quality, comfort and performance.

Our skilled team are experts in creating custom-made earpieces for a wide range of users, whether you are a serious musician, club DJ, gig goer or dedicated music listener.

Whatever your music, monitoring or hearing protection needs, Puretone Music can manufacture and supply the right product for you.

We also manufacture a wide range of in-ear monitor earpieces and hearing protection products here in the UK. As the official UK distributor for Elacin earplugs, we can also supply custom-made filtered hearing protection ideal for musicians, DJs and music lovers.

Two distinct ranges, engineered for different levels of performance.

MOVE

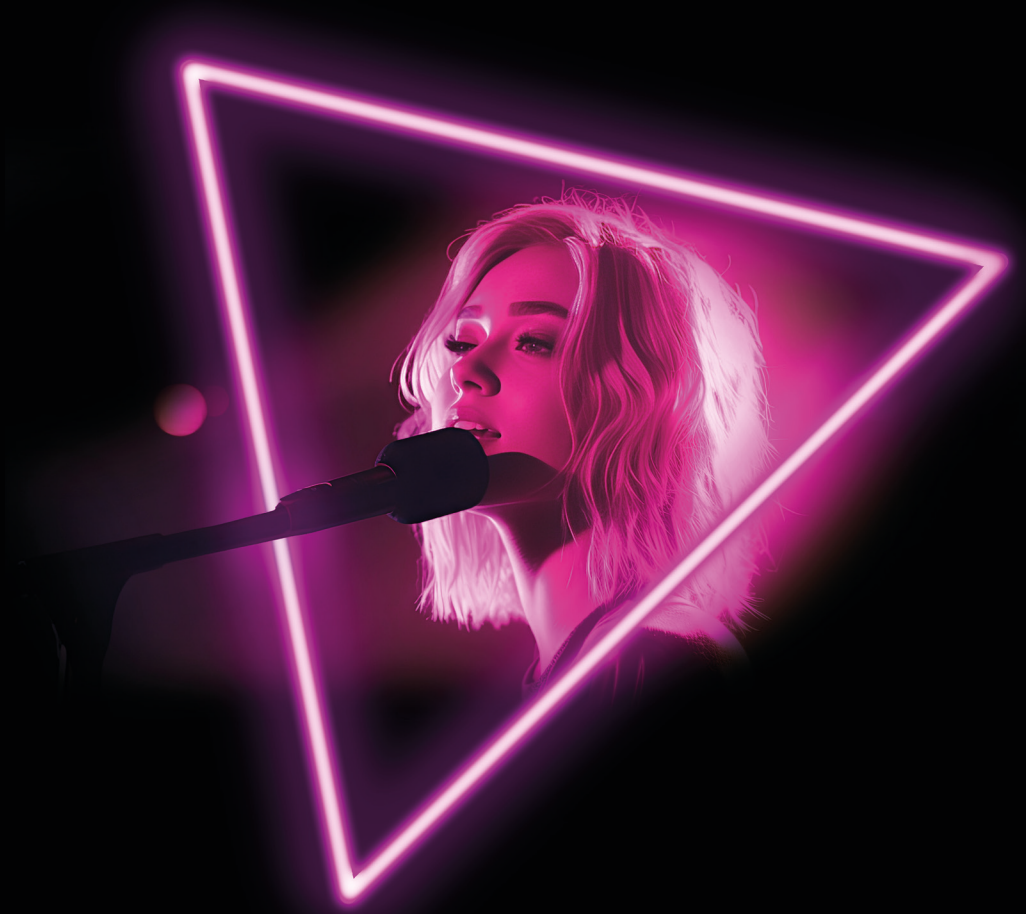

Puretone MOVE range

The MOVE range of in-ear monitors, headphones and accessories blends quality sound with everyday comfort for those on the move. Advanced drivers deliver crisp highs and deep lows for a balanced, immersive listening experience, while the lightweight ergonomic design ensures a secure fit for both casual and developing performers. Performance, comfort and versatility in one streamlined range.

PRO

Puretone PRO range

The PRO range of in-ear monitors is engineered for performers and professionals who demand precision and control. Advanced multi-driver configurations deliver exceptional clarity, balance and accuracy across the full frequency range, while robust custom construction ensures comfort and reliability for stage and studio use. Professional-grade performance without compromise.

MOTO SOUND

In-Ear Communication & Music

Key Features

Canal & full shell versions available

Great sound quality from a single driver

Fits under crash helmets

17 earpiece colour options

Comfortable for long periods

Silicone Earpieces For Lasting Comfort

MotoSound earpieces are custom-made from soft, biocompatible silicone to provide long lasting comfort, even during extended use. Designed to sit deep within the ear canal, they create an effective acoustic seal that helps reduce outside noise while maintaining clear, intelligible audio.

Their compact, low profile design allows them to sit discreetly under helmets, making them ideal for motorcyclists, track riders and racing drivers who need reliable communication alongside effective noise protection. Each pair is supplied with a durable fixed cable and a moulded 3.5 mm jack for secure, dependable connectivity.

Micro Monitor MOVE 1

Drivers	Impedance	Freq. Response
1	16Ω	40 - 19500Hz

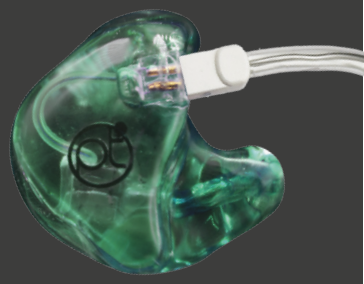

The MOVE 1 is a custom-made single driver in-ear monitor crafted from flexible and comfortable silicone, featuring a dynamic driver that delivers clear high quality audio in a durable and ergonomic design. It includes a 2-pin plug-in cable for easy cable changes and a non gloss soft feel coating for effortless insertion and removal, and is backed by a 30-day fit guarantee, making it ideal for active, on the go users seeking premium sound and everyday comfort.

Micro Monitor MOVE 2

Drivers	Impedance	Freq. Response
2	32Ω	60 - 14000Hz*

The MOVE 2 is a custom-made dual driver in-ear monitor available in silicone or acrylic, with the silicone version offering flexible material and a soft feel coating for easy insertion and removal, and the acrylic option providing a sturdy design for enhanced durability and a secure fit. Both versions feature dual balanced armature drivers, a 2-pin plug-in cable for simple cable changes, and a 30-day fit guarantee, delivering a versatile and high quality audio experience tailored to your preferences.

Micro Monitor MOVE 2V

Drivers	Impedance	Freq. Response
2	32Ω	800 - 12000Hz

The MOVE 2 Voice is a custom-made dual driver in-ear monitor designed for enhanced voice communication, available in silicone with a soft feel coating for flexible comfort and easy insertion, or in durable rigid acrylic for a more secure fit. It features a dedicated voice option for clearer and more precise voice transmission, a 2-pin plug-in cable for easy changes, and a 30-day fit guarantee, making it ideal for communication heavy environments where clarity is essential.

Micro Monitor PRO 1

Drivers	Impedance	Freq. Response
1	36Ω	20 - 19500Hz

The PRO 1 is a custom-made single driver in-ear monitor constructed from comfortable acrylic and designed to deliver clear and precise sound through its dynamic driver. With a durable build, sleek custom design, and a 30-day fit guarantee to ensure a secure and personalised fit, the PRO 1 offers a balanced combination of simplicity, comfort and high quality performance for long-term use.

Micro Monitor PRO 4

Drivers	Impedance	Freq. Response
4	30Ω	50 - 24000Hz

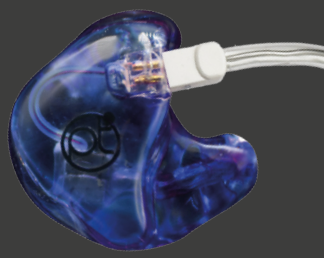

The PRO 4 is a custom-made four driver in-ear monitor available in acrylic or silicone, with the acrylic model offering a sleek and durable design and the silicone version featuring a soft feel coating for easier insertion and removal. Both versions include a new 2-pin plug-in cable for quick and easy cable changes, come with a 30-day fit guarantee, and are built to deliver top quality sound with added flexibility and convenience.

Micro Monitor PRO 5

Drivers	Impedance	Freq. Response
5	86Ω	20 - 22000Hz

The PRO 5 is a custom-made five driver in-ear monitor crafted from durable acrylic and engineered for those who demand the highest possible sound quality, delivering rich, highly detailed audio with exceptional clarity and definition for professionals in music and sound production. Designed for critical listening in both stage and studio environments, the PRO 5 provides outstanding precision and control across the full frequency range. Backed by a 30-day fit guarantee for a secure and comfortable fit during extended use, this flagship model combines advanced driver technology with a sleek custom design, offering the superior performance, reliability and confidence serious professionals expect.

ER

Premium Hearing Protection

Key Features

Custom moulded from your impressions

Flattest possible attenuation

Perfect for the music industry

High speech clarity in conversations.

Comfortable wear for all-day use.

Protect Without Distortion

Elacin ER noise plugs feature individually calibrated filters available in 9, 15 or 25 dB, designed to attenuate all frequencies evenly for consistent, natural and balanced sound reduction. Available in clear, black, red, yellow and green, they are developed specifically for the music industry to reduce harmful noise exposure while maintaining exceptional audio clarity.

By limiting only the levels that pose a risk, ER noise plugs protect hearing without distorting the sound, preserving the full integrity of music and speech. This allows musicians to communicate clearly and continue enjoying their performance while staying safely and comfortably protected.

Clients - Steps

Puretone Music is proud to have provided Micro Monitor Classic 3s to support Steps on their 'Steps Ultimate Tour' in 2012!

Formed in 1997, Steps were the pop sensation of the millennium. In total the five-piece has sold 20 million records, and achieved 14 consecutive top 5 singles. They have won countless awards and had sell out tour after sell out tour all over the globe. They were the second most successful British pop group ever!

"Puretone Music in-ear monitors helped me to fully focus on the musical dynamics of our Ultimate tour, providing clear quality of sound and in-ear comfort every night."- Lee, Steps.

Faye | Claire | Lee | Lisa | H

Trusted on some of the world's biggest stages

Over the years, Puretone has supplied hearing protection and hearing solutions to some of the world's most recognised artists and performers.

Austin Dickinson, Rise To Remain

"Puretone are the only in-ear monitors I can use night after night, and I still get surprised by them. Cracking stuff."

Justin Quinn, Guitarist & Composer

"Puretone Micro Monitors deliver a fantastic level of clarity across the audio spectrum without the midrange spike found in many other in-ears. I rarely leave home without them!"

Sam Ryder, The Morning After

"Our Micro Monitor 2s guarantee we nail those supersonic highs every time!"

Andy Pelos, Showaddywaddy

"IEMs have given me a greater sound quality, helping me to improve my vocals. You're able to move freely around the stage. They also lower the decibel level, saving my hearing. I strongly recommend custom in-ear monitoring and Puretone Music."
